Lighting design Office of Light

The Radiant 3D LED Flex 100 system was used to up-light the domes in the Burberry flagship store in Regent Street with lighting design by Russell Lipscombe from Office of Light. The patented mechanical joint structure allows the individual modules to be bent and twisted in three dimensions to follow domes and other non-linear building contours. Each 100 mm module comprises of 4 x high power LEDs with elliptical beam lenses - creating a highly-controlled light graze effect, illuminating the dome with an even distribution of light. Each LED heat sink module can operate up to 10 Watts of LEDs giving a light output of over 9,500 lumens per mtr.

3D LED Flex 100 IP20
4 x Nichia NS6 LEDs per module
Modular, 3D Flexible LED linear lighting system
Up to 9,500 Lumens per Mtr.
