Centura 40 IP20 System
Modular, flexible or bespoke fixed-shape, linear LED lighting system
4x high power LEDs with elliptical beam lenses per 100 mm module
Up to 5,000 Lumens per mtr

Radiant's Centura System IP20 was specified by lighting designers, 18 Degrees, as part of the lighting scheme for the new headquarters of the prestigious law firm, Freshfields Bruckhaus Deringer LLP in the heart of the City of London.

The linear modular Centura system, with high-power LEDs and elliptical beam lenses, provides a highly-controlled light grazing effect in several locations throughout the building. The photos below show the Centura providing a graze of light down the sheer curtains, and onto the floor below - encircling the communal seating areas with a warm glow of light. This version of the Centura System can produce up to 4,000 Lumens per mtr.

The Centura system was produced in a series of custom curved and straight fixed-shape lengths. The surface-mounted system is recessed within the ceiling details. The Centura system's anti-glare louvres ensure excellent visual comfort.
